Poland is located in the middle of Europe. It links East and West not only geographically but also culturally.

The country’s territory is 322,575 sq km; inhabited by 38 million people.

Poland is a member of:
- the European Union (EU)
- the North Atlantic Treaty Organization (NATO)
- the United Nations (UN).

Poland is a country of beautiful landscapes. Territory extends across several geographical regions, from the Baltic Sea in the north to the Carpathian Mountains in the south, through the post-glacial lakes districts like the Masurian Great Lakes, lowlands and highlands.

Reviews

Studying at the Medical University of Lodz has given me the opportunity to make friends and colleagues from around the world. Some of the benefits of studying here include the small class sizes and clinic groups as well as taking National Board Medical Examinations (NBME) that have helped me to keep up with the North American curriculum. I have also had the opportunity to experience the Polish culture, the European health care system and do some traveling within Europe while studying here.

I wanted to be a dental practitioner in order to improve people’s health and help them live a healthy lifestyle. The Medical University of Lodz is one of the most recognized medical and dental teaching schools in Europe. I think I have made the right decision to study at this University as I get to practice with the latest technology and dental equipment while I get the best learning experience.

Anokshan Paheerathan, 2nd year of 5DMD program, Australia

Vanessa Pasztor, 4th year of 4MD program, Canada
Poland, the largest country among the newest members of the European Union has one of Europe’s youngest populations - half of its citizens are less than 35 years old. Out of nearly 39 million Poles almost 2 million are university students.

Polish diplomas are recognized in the European Union (EU) and worldwide, in countries like the USA, Canada and Australia. Studying in Poland gives you a solid education and a better chance to find a good job in the EU and beyond!

The city of Lodz is situated in the centre of the territory of Poland.

Establishment: First half of 14th century  
City rights: 1423  
Population: around 750 000

In the 19th century Lodz was one of the Europe’s biggest and fastest growing textile industry centers.

At that time, a new identity of the city – „a promised land“ and “a city of many cultures” was created.

The city where people of different nationalities and religions shared the same dream of success.

Lodz, the former textile industry empire, now becomes a city of modern technologies, a city of culture and grand events.

New York Times located Lodz on the list of the 45 places to Go in 2012.

The Hollywood of Poland reclaims its industrial past.

Poland’s third-largest city and the movie-making headquarters of the country (with a film school that shared the honors with Roman Polanski and Andrzej Wajda), Lodz has converted its labyrinth of textile warehouses and industrial-era relics into passageways for artistic and entrepreneurial ventures. …"
To study at the Medical University of Lodz

The Medical University of Lodz (MUL) is one of the largest state-owned medical universities and one of the leading research centers in Poland.

The University has the following faculties and divisions:

- Faculty of Medicine
- Faculty of Pharmacy
- Faculty of Health Sciences
- Faculty of Biomedical Sciences and Postgraduate Training
- Military Faculty of Medicine
- Division of Studies in English

MUL in numbers:

- 8,800 students
- 600 foreign students
- 1,600 employees, including 180 professors, 180 associate professors, over 850 PhD academics
- 3 teaching hospitals*
- 61 clinics
- 25 departments
- 1,558 beds
- 83,000 hospitalized persons
- 45,962 square meters of didactic space
- 24 didactic buildings
- 4 dorms
- 1,152 places in the dormitories

* The Medical University has not only three clinical hospitals, but also there are agreements between 4 affiliated hospitals. Those hospitals together offer 2,652 beds and perform over 1,1067 major operations.
WHY STUDY AT MUL?

» The best medical education - Leader in scientific publications and citations according to the Higher Education ranking of “Perspektywy” 2015, Polityka
» Top quality of education in Europe, brand new Dentistry Teaching Center
» Knowledge and practice at reasonable costs
» Clinical training in 3 clinical hospitals
» Over 60 student research circles
» Over 70 years of tradition in medical education
» The most academic friendly environment in the heart of Poland

Our programs are comprehensive enough to be accepted internationally.

Thanks to the ECTS (European Credit Transfer System) our students can be fully mobile, and continue education in other countries.

MUL diploma is recognized by Medical Council in Canada, by US Department of Education and ECFMG as well as in European Union.

Introduced NBME exams help to prepare our international students to pass USMLE exams in the USA.

Our educational offer, gradually and consequently modified and widened, raises great interest among both international and Polish students. Medical teaching in English was initiated in 2003/2004. Presently 600 foreign students from various countries (USA, Canada, Norway, Taiwan, Saudi Arabia, Spain, Sweden, Great Britain, Nigeria, Germany, Malaysia, India, Ireland, France and others) attend medical and dental programs taught entirely in English.

We offer the following programs wholly taught in English:

» 6-year MD program (requires high school certificate),
» 5-year DMD program (requires high school certificate),
» 4-year MD program (completion of pre-medical program minimum at the level of BSc degree),
» 3-year B.Sc. Nursing program (requires high school certificate),
» 4-year PhD program (requires MD or MSc diploma),
» 8-month Premedical Preparatory Course (requires high school certificate).
6-YEAR MD and 5-YEAR DMD
- for high school/secondary school graduates

- High school diploma or a secondary school leaving certificate qualifying for admission to a university or medical school in a home country.
- Extended level of knowledge (advance placement) in 2 of the following subjects: Chemistry, Biology, Physics, Mathematics – documented by the school leaving certificate/diploma. The grades required should be above the average.

The above knowledge is to be verified during the Skype interview/entrance exam.
- English competency written and spoken confirmed by the respective certificates as: CAE, CPE, TOEFL PBT (min 500 points), IELTS (min 6.0 points) if the secondary education was not conducted in English.

The command of English of candidates who cannot present any of above certificates will be assessed during an interview.

4-YEAR MD
- for college/university graduates

- The 4-year MD curriculum, as a part of the 6-year program, is tailor-made for those university students from USA, Canada, Taiwan or American universities in other countries, who meet the following admission criteria:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry/general</td>
<td>I and II</td>
</tr>
<tr>
<td>Chemistry/organic</td>
<td>I and II</td>
</tr>
<tr>
<td>Biology</td>
<td>I and II</td>
</tr>
<tr>
<td>Physics</td>
<td>I and II</td>
</tr>
</tbody>
</table>

(8 credits are equal to one year of studies | Humanistic and sociological courses – All together – 9 credits)
Each candidate should demonstrate completion of pre-medical program minimum at the level of BSc degree.

If the pre-medical studies were not conducted in English, the English knowledge certificate is required, such as CAE, CPE, TOEFL PBT (min 500 points), IELTS (min 6.0) points.

The command of English of candidates who cannot present any of above certificates will be assessed during the entrance exam.

3-YEAR B.Sc. Nursing
- for high school/secondary school graduates

High school diploma or a secondary school leaving certificate qualifying for admission to a university or medical school in a home country

Standard level of knowledge in Biology, documented by the school leaving certificate/diploma. The grades required should be above the average.

The above knowledge is to be verified during the Skype interview/entrance exam.

English competency written and spoken confirmed by respective certificates such as: CAE, CPE, TOEFL PBT (min 500 points), IELTS (min 6.0 points) if secondary education was not conducted in English.

The command of English of candidates who cannot present any of above certificates will be assessed during an interview.

8-MONTH
- Premedical Preparatory Course

Preparatory Course taught in English is organized by the Medical University of Lodz for the international students planning to apply for medical and dentistry programs in order to repeat and improve the knowledge required on the entrance exam. It also aims at making up the differences of candidates’ knowledge in the prerequisite subjects to help them in their first year of studies.

High school diploma or a secondary school leaving certificate qualifying for admission to a university or medical school in a home country.

Extended level of knowledge (advance placement) in 2 of the following subjects: Chemistry, Biology, Physics, Mathematics – documented by the school leaving certificate/diploma. The grades required should be above the average.

Admission is based on formal verification of the documents.

English competency written and spoken confirmed by respective certificates such as: CAE, CPE, TOEFL PBT (min 500 points), IELTS (min 6.0 points) if secondary education was not conducted in English.

The command of English of candidates who cannot present any of above certificates will be assessed during an interview.

4-YEAR PhD
- Doctoral studies in English

The Medical University of Lodz runs a PhD program in medicine, dentistry, pharmacy and biomedical research. This program is addressed to international candidates who are looking for research and teaching opportunities in the field related to life sciences.

The candidate should submit the following documents:

MD or MSc diploma (for graduates from Polish universities) - original and certified copy of or certification about studies completion and the predicted date of master thesis defense

MD or MSc diploma (for graduates from foreign universities) - original and certified copy (apostille) certified by local Ministry of Education or respective local authorities

Transcript of record

Publications and other science achievements list

Certificate confirming English language skills

The quality of our teaching remains one of the highest among Polish universities, which is reflected by official inspections and rankings. The students of the Faculty of Medicine are the winners of the most prestigious scientific awards like “Medical Laurels” of the Polish Academy of Science or Best Student Awards like “Primus Inter Pares”.

The Division of Dentistry at the Medical University of Lodz realizes a 5-year DMD program in the English language, with a complex medical-dental curriculum.

The main goal of the dental studies is to educate well-qualified dental practitioners able to enter the profession of a Doctor of Dental Medicine (лат. Doctor Medicinae Dentium – pol. Lekarz dentysta) with excellent clinical skills, able to conduct scientific research, provide professional dental health care based on human approach, and teach dental students.

In 2012 a brand new Teaching Centre, one of the most modern clinical centres in Europe, was opened with new classrooms and lecture halls, complete with computer-compatible projectors and PA systems, with clinical rooms equipped with the most modern dental units and phantom rooms with working stations for 20 students each.

Dentistry studies in Lodz are a perfect combination of tradition and experience with modern technologies. The Institute of Dentistry with the new Teaching Centre is an ultra-modern complex able to simultaneously accommodate 2500 students.

Dental education begins in special phantom rooms, with the design oriented towards improving students’ practical skills through simulation of their future clinical work.

The Laboratory of Preclinical Didactics in Dentistry is unique in Poland and implements the world educational standards. It comprises 3 simulation rooms equipped with 50 modern phantom units and 13 dental units.

The Institute of Dentistry of the Medical University of Lodz is equipped with 165 clinical units. Such an extensive background enables the education of dentistry students in areas of endodontics, pediatric dentistry, orthodontics, dental prosthetics, dysfunctions of oromandibular system, oral surgery, periodontology and oral mucosal diseases. Modern clinical and didactic infrastructure and highly qualified academic staff make it possible for the dentistry graduates of the Medical University of Lodz to manifest high-quality world-standard knowledge and practical skills. The Institute of Dentistry and the Teaching Centre host numerous scientific conferences and symposia, as well as the specialization and development courses which assist in improvement of professional knowledge and qualifications.
The Clinical and Teaching Centre houses the University Laboratory of Material Research and the University Laboratory of Preclinical Didactics in Dentistry with four big laboratories fully equipped for analytical sample research.

All candidates are cordially welcome to start application procedure from February. Entrance exams in form of Skype interview will begin in April.

**Overall costs**

**Accommodation**

The University provides housing on campus in three dormitories/residence halls. Especially freshmen and sophomore students are advised to stay at the dorms. Here you will feel at home with helpful English-speaking staff and your fellow students who will help you in the orientation process as well as with your Polish.

The majority of teaching departments are located in the dorm's vicinity. Other university departments or clinics are available by public transport.

The dorms represent various levels of housing conditions which is reflected in the rent. There is a check-in deposit (one-monthly rent) paid together with the first rent payment refundable at check-out.

Those who prefer to live outside the campus will be provided with a list of private flat renting agencies.

Especially we recommend our newly renovated dormitory no. IV located on the University campus at 1 Hallera Sq. The surrounding area with parking space around is under constant surveillance.

The rooms are well equipped with new furniture and facilities.
