

MD Advanced Program

List of textbooks

Each edition and variation (with the exception of reprints) of a book is assigned an ISBN. The ISBN is 13-digits long if assigned after January 1, 2007 and 10-digits long if assigned before that date. This change is caused by the current international standard ISO 2108. The link to the program given below helps to convert a series of 10-digit ISBNs to 13-digit ISBNs numbers: www.isbn-international.org/converter/converter.html
